1. VERDICT & SCORE

Signal score: 67/100 \(\EMERGING\)
Confidence: 77%
Leading hypothesis: solid state battery manufacturing scale-up ecosystem entering a genuine acceleration phase

2. SIGNAL DNA

7. COMPETING HYPOTHESES

#1 [LEADING] prior 58% -> posterior 58%

solid state battery manufacturing scale-up ecosystem entering a genuine acceleration phase

#2 [CANDIDATE] prior 34% -> posterior 34%

Short-term spike; cyclical or seasonal noise

#3 [CANDIDATE] prior 26% -> posterior 26%

Coordinated publicity inflating perceived momentum

8. INVALIDATORS \ (what would kill this signal)

[] Coverage volume for "solid state battery manufacturing scale-up" returns to historical baseline within one week

[] Independent outlets stop adding NEW reporting \ (only syndicated copies appear)

[] No independent confirmation emerges within the time horizon

[] Key named entities issue denials or retractions

[] Downstream indicators \ (hiring/GitHub/procurement) flatten or reverse
